

NSF REU Summer 2004

This summer a group of 17 students participated in a summer research program at Kent State sponsored by the National Science Foundation. Research Concentrations included liquid crystals, materials science and biomembranes. Each student earned a salary of \$3,300 for the summer and was provided a dorm room. The students attended weekly seminars, cleanroom training, student research presentations and an undergraduate research conference. A list of student research projects can be found online at: <http://dept.kent.edu/Chemistry/REUnew/Projects.htm>
